Company Overview

Who We Are

Kuwait Investment Company, “KIC”, is the first investment company to be incorporated in Kuwait in 1961 and is considered one of the leading investment companies locally and within the region. KIC provides comprehensive financial services in several segments which include; Asset Management (through investment funds and portfolio management), and Investment Banking services.

KIC engages in a wide range of investment and financial activities, based on asset management through a variety of local, regional, and international funds and portfolios, in addition to providing a diverse and integral set of investment and financial products and services, local and global, to its local and international clients.

KIC has been listed on the Kuwait Stock Exchange since 1984. In addition, 62% of KIC is owned by Kuwait Investment Authority, “KIA”, which is the Kuwaiti Sovereign Wealth Fund.

Over the past five decades, the company has continually broken new grounds in introducing a unique blend of financial and investment products, advising and supporting its clients on strategic transactions. Also, providing new opportunities for individual and institutional investors.

As of June 30, 2023, KIC has total assets of KWD 257 Million and has a total AUM (Assets under Management) amount to approximately KWD 1.9 Billion.

ASSET MANAGEMENT SECTOR – OUR INVESTMENT PROCESS

- ❖ Successful investing is a marathon, not a sprint. That is why we have a rational, long-term perspective.
- ❖ We are disciplined in the implementation of our investment style. We control risk through diversification and rigorous security selection.
- ❖ We invest in shares of high-quality, growing companies with strong operations and quality earnings.

At KIC the investment process starts with our clients. We are committed to offering customized portfolio solutions to suit each client's investment objectives and risk tolerance. This begins with a client questionnaire and meeting to better understand the client's unique expectations.

Then our experienced team of portfolio managers and analysts starts the asset allocation and security selection process with a top-down consideration of asset classes, regions and industries, combined with bottom-up security selection.

KIC Investment Philosophy

Our primary goal is growing capital for our clients in a low-risk manner. Our Investment Philosophy is founded upon conservative principles of fundamental investing. We construct diversified portfolios that are designed to preserve original capital and to achieve long-term growth.

Our investment approach is research-intensive and is built around identifying changes in the key drivers affecting markets. We concentrate on investing in value, financially sound, growth and sector-leading stocks with strong cash flows and stable earnings streams that are expected to outperform the market over the long-term. This approach is reinforced through extensive in-house equity analysis.

Portfolio and fund managers mainly follow the top-down approach in investing. Our asset managers focus on selecting the best possible individual assets. They analyse the key drivers of prices, assess what's factored into these prices, and judge what is likely to shift investors' expectations.

KIC Investment Funds- Profile

AL-RAED Investment Fund
